

CLARITY lead

Efficient, tried and trusted sorting technology

- Maximum elimination rate with minimum glass loss
- More than 50 special glass sorting systems in use

High-res UV-Vis sensor fusion

- Resolution approx. 0.5 x 0.5 mm per pixel
- Lead glass detection from 3 mm + 0.5 % PbO content and up.

Lead glass detection through UV fluorescence

Without X-ray technology

2-/3-way system

High availability and low maintenance costs

Simple operation and maintenance

Existing systems are easy to retrofit

Sorting width	700 mm	1000 mm	1400 mm
Capacity	~ 7 t/h	~ 10 t/h	~ 14 t/h
Grain size	3 - 50 mm		
Sensor system	UV-Vis sensor fusion
